

TECHNICAL BULLETIN

SOFTWARE UPDATE V2.55

T16.004

IMPLEMENTATION DATE:

Version 2.55 is available for download as of 4/7/16. MVP machines will be built with v2.55 software starting mid-April 2016.

MACHINES AFFECTED:

All MVP series machines can be upgraded to v2.55. Do not use on any machines EXCEPT MVP series. MVP machines using software earlier than v2.54 are encouraged to upgrade for stability. MVP machines already on v2.54 should upgrade if brew mode lockout is a desirable feature.

REASON FOR CHANGE		RETROFIT STATUS		PRIORITY OF UPDATE	
RELIABILITY		NON-RETROFITABLE		HIGH	
SERVICEABILITY		GEN 1 ONLY		MEDIUM	
AESTHETICS/INTERFACE	X	GEN 2 ONLY		LOW	
MANUFACTURING		MVP SERIES ONLY	X	OPTIONAL	X
		UNIVERSAL			

SUMMARY OF CHANGES:

- Added the ability to prevent the user from changing brew modes using the brew group actuator. This is very similar to the save mode lockout already implemented in v2.54.
- Download the v2.55 update package at:
[http://synesso.com/share_docs/MVP_MODELS/Synesso_Firmware_Updater_\(v2.55\).zip](http://synesso.com/share_docs/MVP_MODELS/Synesso_Firmware_Updater_(v2.55).zip)
- Updating requires a Windows PC/laptop running XP, Win7, or Win8, and an A/B USB cable.
- Read the documents in the update bundle for installation instructions and a changelog.

DISCONTINUED PARTS:

This is a software-only change.

NEW PARTS:

This is a software-only change.
